RE: BUSH GUARDS AIR BAG COMPATABILITY

This serves to verify the following:

All **RHINO BAR** bush guard mounting brackets on all different LDV's are designed to be air bag compatible.

The main frames for all LDV's are very similar in construction (only the mounting brackets vary).

Many years ago, we received assistance from a laboratory in Adelaide, Australia, for the design of the mounting bracket.

I would like to add that all our bush guards are air bag compatible. They are also vibration tested in our lab and conform to SANS 1587:2007.

PLEASE NOTE:

There are several potential reasons why an airbag may not function or deploy, and this is not due to the presence of the bush guard.

Please do not hesitate to contact me with any other questions or concerns you might have.

Yours Sincerely

C KARAS
TECHNICAL DIRECTOR
